≡ Ordered Pitch Intervals

6 Qs · Fill in the Blank

Title

Ordered Pitch Intervals

Instructor note

Instructor note

A short note to yourself or other instructors (invisible to students)

Instructions

For each interval, enter the **ordered pitch interval** in the box below.

e.g. for this interval:

you would write "+**4**".

and for this interval:

you would write "-**3**".

n.b. For positive numbers, remember to include the plus sign (e.g. +**4**). To write a negative number, you can use the hyphen (e.g. -**3**, most likely to be on your keyboard), the minus (**−3**) or the n-dash (**–3**).

Your instructions (in addition to or instead of the default instructions)

Copy and edit default instructions

Show default instructions

No

Should default instructions be appended to your instructions? When "subtle," default instructions are hidden at first and students click a button to view them.

☑ Automatically mark invalid answers incorrect

If answer keys are enabled, then any answer that does not match an answer key will automatically be incorrect. (Use with care: be sure that your answer keys include *all* variations of an answer before enabling this feature!)

☐ Case sensitive

If answer keys are enabled, then answers will only be automatically marked as correct if they match the *case* of an answer key. Useful for input involving Roman numerals, key names, etc.

☐ Remove non-alphanumeric characters from answers

If answer keys are enabled, then all characters except numbers and letters are removed from the student answer before automatically grading. Useful for post-tonal input where the following answers should be treated as equivalent: `[0,1,2]`, `[0, 1, 2]`, `{0 1 2}`, `(012)`, `012`.

Auto-adjust the total number of questions to display

Opt out of this setting when the exercise should only display a subset of questions to students.

Questions

Question 1
