1.1 — Name Pitches from Distances (10 Qs, 1 pt each)

Answer the following questions about pitch distances ("counting like a musician"). These questions suppose that you have an instrument like a harp where each adjacent string is an adjacent letter of the musical alphabet, C-D-E-F-G-A-B, and prepare you for talking about distances in music.

Question 1

If **D** is the first string, what pitch is the **fourth** string?

E	F	G	A

Question 2

If **F** is the first string, which of these strings would a **D** be found on?

ninth	seventh	sixth	eighth

Question 3

If **G** is the first string, which of these strings would **A** be found on?

second	fifth	third	fourth

Question 4

If **B** is the first string, what pitch is the **fourth** string?

F	D	G	E

Question 5

If **C** is the first string, what pitch is the **second** string?

E	F	G	D

Question 6

If **G** is the first string, which of these strings would **D** be found on?

fourth	third	fifth	second

Question 7

If **E** is the first string, what pitch is the **third** string?

G	A	F	E

Question 8

If **A** is the first string, which of these strings would **D** be found on?

second	third	sixth	fourth

Question 9

If **B** is the first string, what pitch is the **third** string?

F	C	D	E

Question 10

If **C** is the first string, which of these strings would another **C** be found on?

ninth	eighth	sixth	seventh

1.II — Pitch in Staff Notation

A — Identify Pitches in a Melody (1 Q, 10 pts)

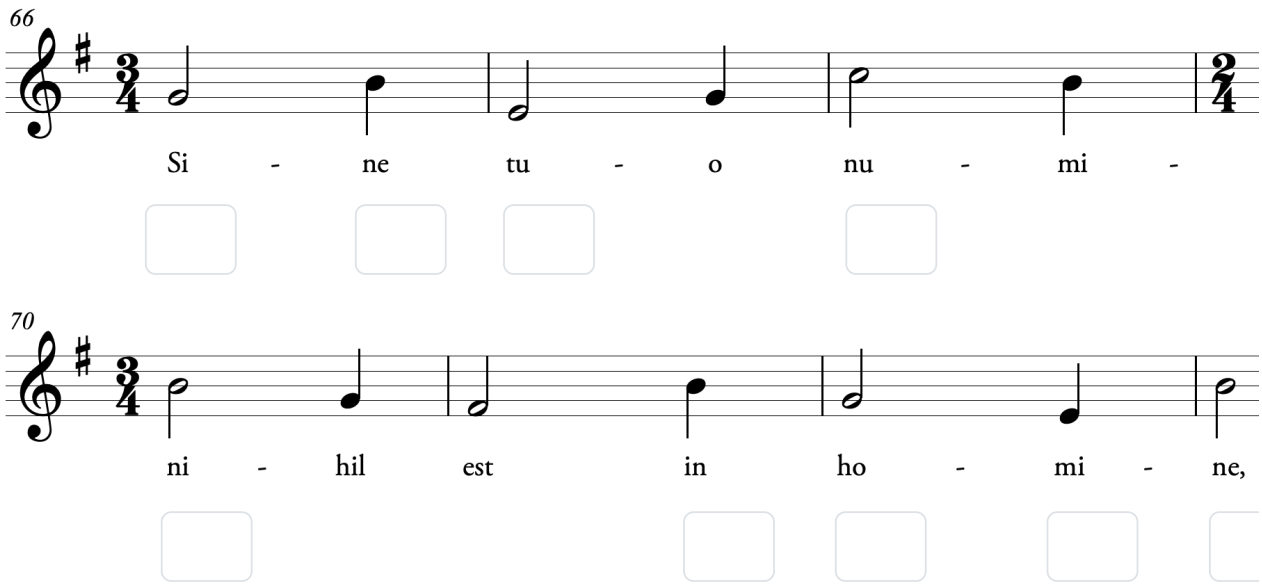

Identify the pitches marked with boxes in the following melody.

Arvo Pärt, "Veni Sancte Spiritus" from *Berliner Messe* (1990), soprano part only.
Text: *Without your spirit, people are nothing*

0:00 / 0:16

Question 1

Example: G4 D4 B3 D5 E5 C6

Question 1

Question 2

Question 3

Question 4

Question 5

C – Create Pitches with Ledger Lines and Octaves (9 Qs, 1 pt each)

Now identify these pitches creating them in the correct octave. You may need to use ledger lines to answer the question. Clefs will vary from question to question.

Click the staff to create pitches in the following excerpts. The pitch must be in the specified octave.

Example

Example

Example: **D4**

Question 1

Create the pitch: **A2**

Question 2

Create the pitch: **E2**

Question 3

Create the pitch: **C5**

Question 4

Create the pitch: **F2**

Question 5

Create the pitch: **D4**

Question 6

Create the pitch: **C6**

Question 7

Create the pitch: **F4**

Question 8

Create the pitch: **D2**

Question 9

Create the pitch: **B4**

D — Transpose by Octave to a New Clef (2 Qs, 2 pts each)

Rewrite the given melody in a new clef (the number of octaves to change will be given below).

Question 1

Above: Given melody (click to play)

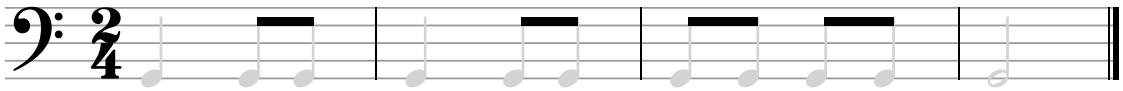

Rewrite the melody in the new clef while transposing the melody **2 octaves up.**

Question 2

Above: Given melody (click to play)

Rewrite the melody in the new clef while transposing the melody **2 octaves down.**

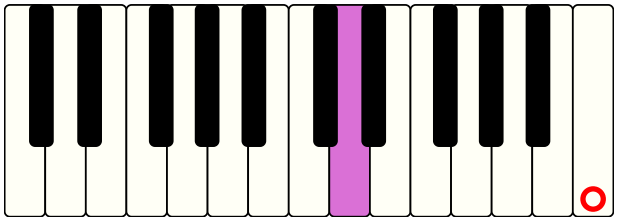

1.IV — The Piano Keyboard and Whole Steps and Half Steps

A — Keyboard to Staff (White Keys) (10 Qs, 1 pt each)

For each question, you will be given a note highlighted on the keyboard. You then will need to select the appropriate position on the staff. The octave entered must be the same as the octave displayed. Middle C will be marked with a red circle on the keyboard.

Question 1

Find the highlighted key on the piano...

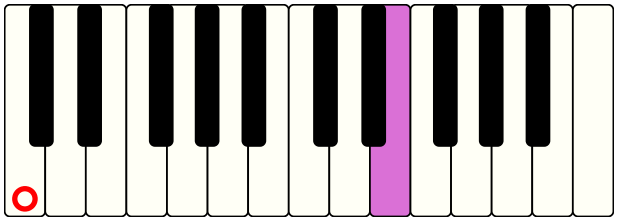

...click the appropriate staff position, respecting middle C position.

Question 2

Find the highlighted key on the piano...

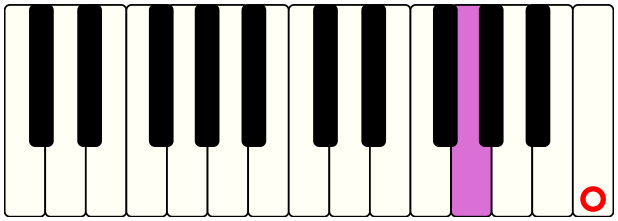

...click the appropriate staff position, respecting middle C position.

Question 3

Find the highlighted key on the piano...

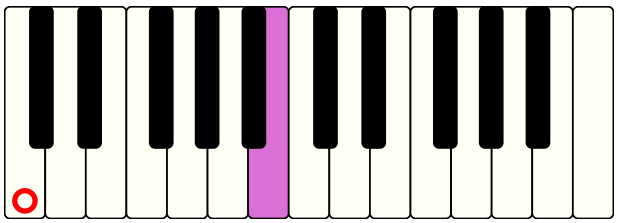

...click the appropriate staff position, respecting middle C position.

Question 4

Find the highlighted key on the piano...

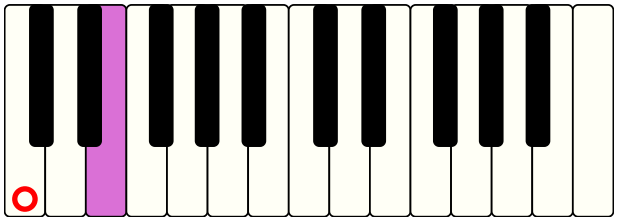

...click the appropriate staff position, respecting middle C position.

Question 5

Find the highlighted key on the piano...

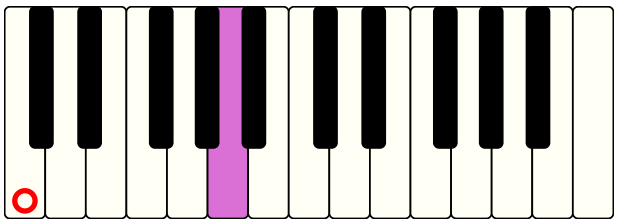

...click the appropriate staff position, respecting middle C position.

Question 6

Find the highlighted key on the piano...

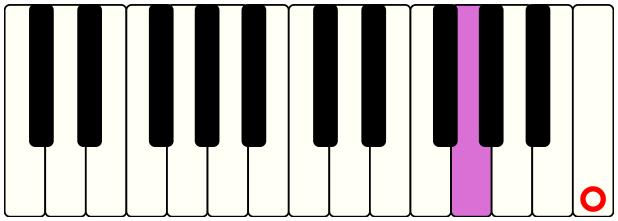

...click the appropriate staff position, respecting middle C position.

Question 7

Find the highlighted key on the piano...

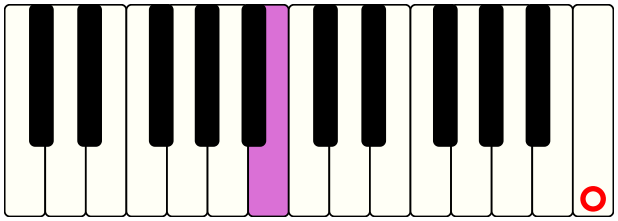

...click the appropriate staff position, respecting middle C position.

Question 8

Find the highlighted key on the piano...

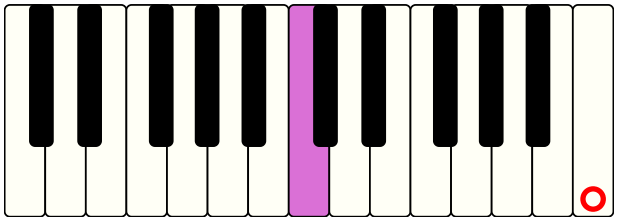

...click the appropriate staff position, respecting middle C position.

Question 9

Find the highlighted key on the piano...

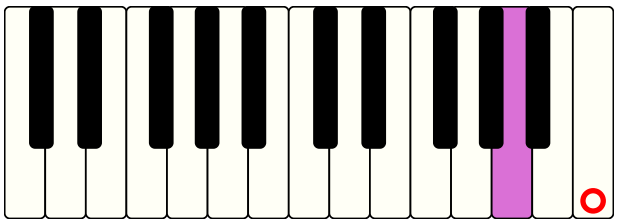

...click the appropriate staff position, respecting middle C position.

Question 10

Find the highlighted key on the piano...

...click the appropriate staff position, respecting middle C position.

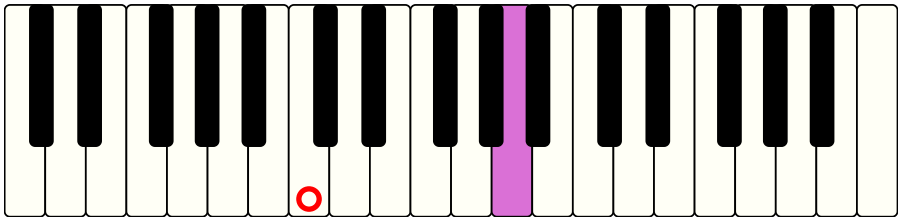

B — Keyboard to Name and Octave (White Keys) (10 Qs, 1 pt each)

Now write the letter name (with octave) of the highlighted piano note(s).

Question 1

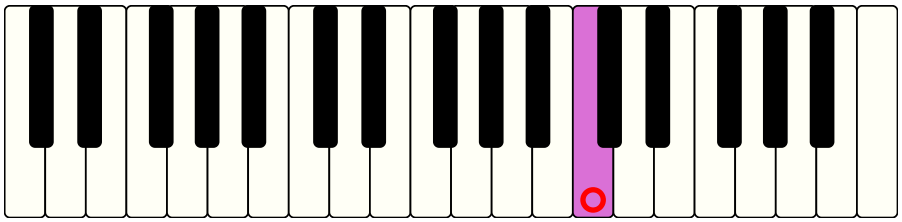

Find the highlighted key on the piano...

...type the name **and octave** of the note into the box.

Question 2

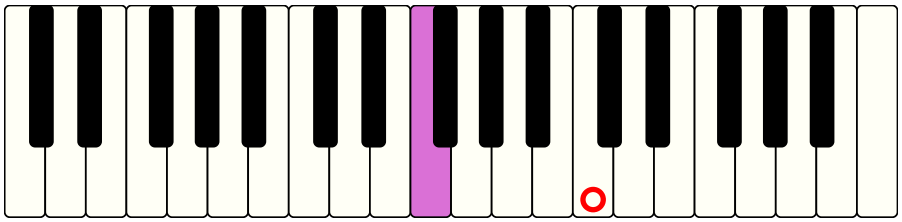

Find the highlighted key on the piano...

...type the name **and octave** of the note into the box.

Question 3

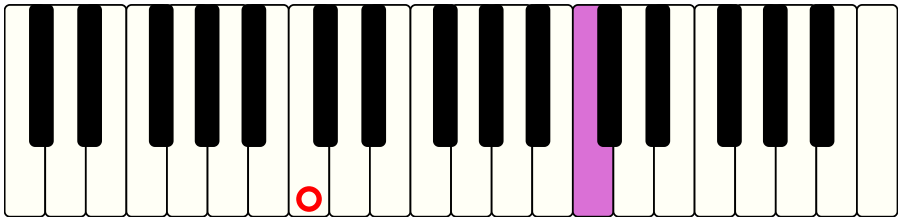

Find the highlighted key on the piano...

...type the name **and octave** of the note into the box.

Question 4

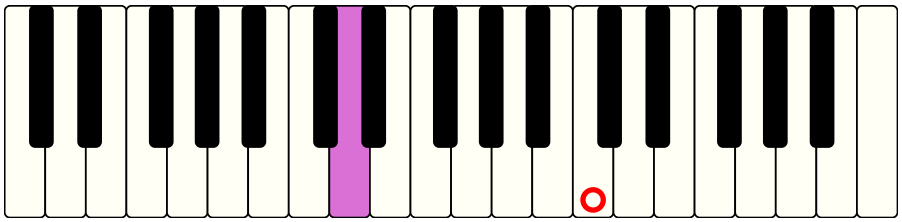

Find the highlighted key on the piano...

...type the name **and octave** of the note into the box.

Question 5

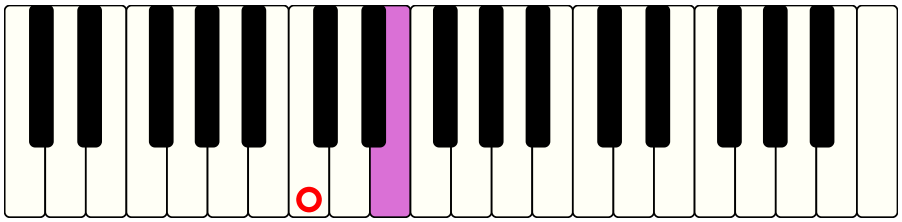

Find the highlighted key on the piano...

...type the name **and octave** of the note into the box.

Question 6

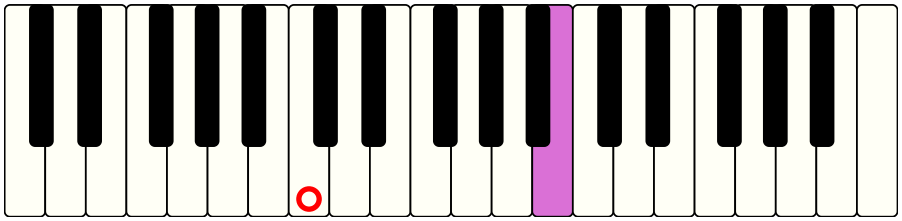

Find the highlighted key on the piano...

...type the name **and octave** of the note into the box.

Question 7

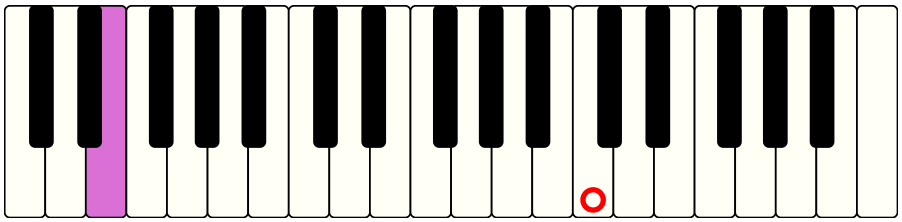

Find the highlighted key on the piano...

...type the name **and octave** of the note into the box.

Question 8

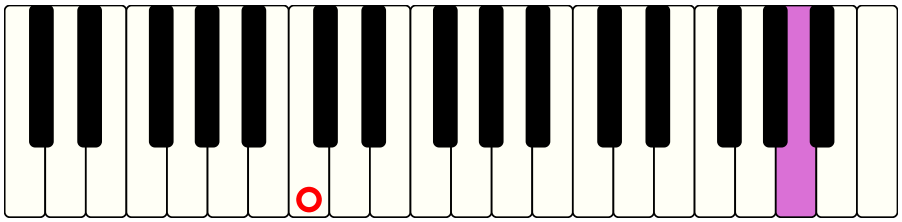

Find the highlighted key on the piano...

...type the name **and octave** of the note into the box.

Question 9

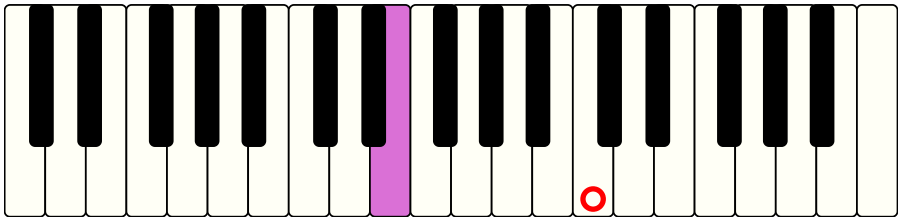

Find the highlighted key on the piano...

...type the name **and octave** of the note into the box.

Question 10

Find the highlighted key on the piano...

...type the name **and octave** of the note into the box.

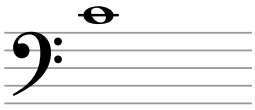

C — Staff to Piano (White Keys) (10 Qs, 1 pt each)

Now identify the pitch from the keyboard:

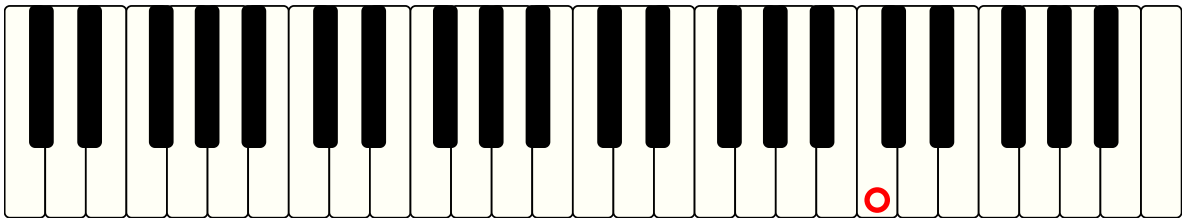

For each question, you will be given a note written on a staff. You then will need to select the corresponding key on the keyboard displayed. The octave entered must be the same as the octave displayed. Middle C will be marked with a red circle on the keyboard.

Question 1

Think of the name of the note on the following staff...

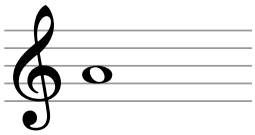

...select the matching key on the piano, respecting middle C position.

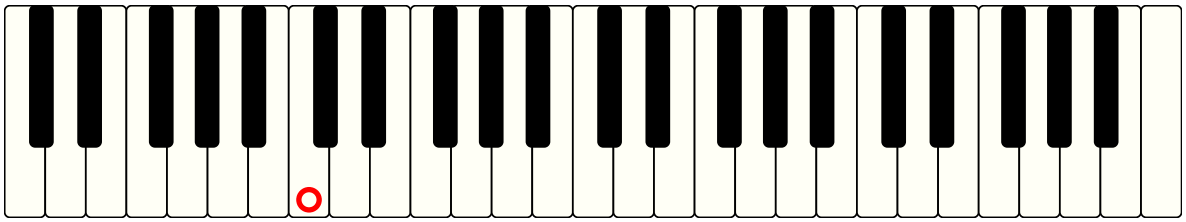

Question 2

Think of the name of the note on the following staff...

...select the matching key on the piano, respecting middle C position.

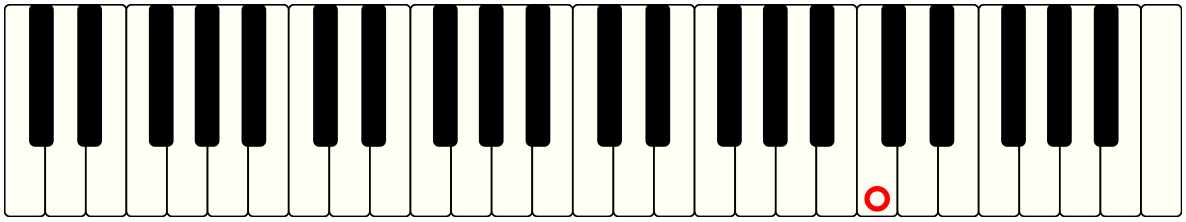

Question 3

Think of the name of the note on the following staff...

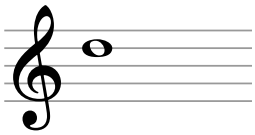

...select the matching key on the piano, respecting middle C position.

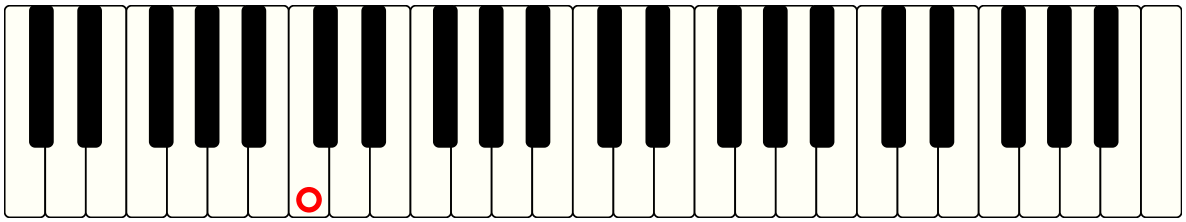

Question 4

Think of the name of the note on the following staff...

...select the matching key on the piano, respecting middle C position.

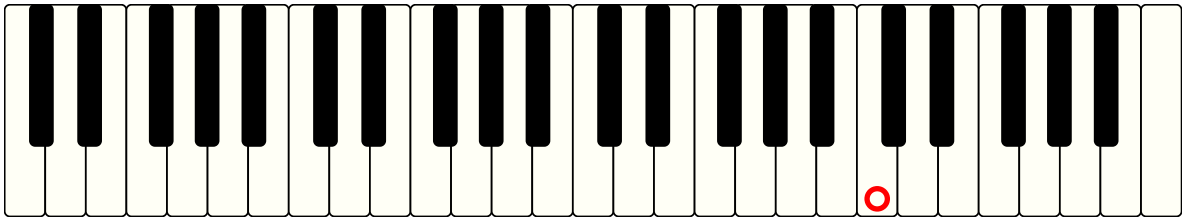

Question 5

Think of the name of the note on the following staff...

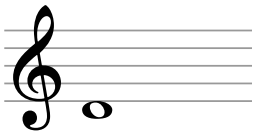

...select the matching key on the piano, respecting middle C position.

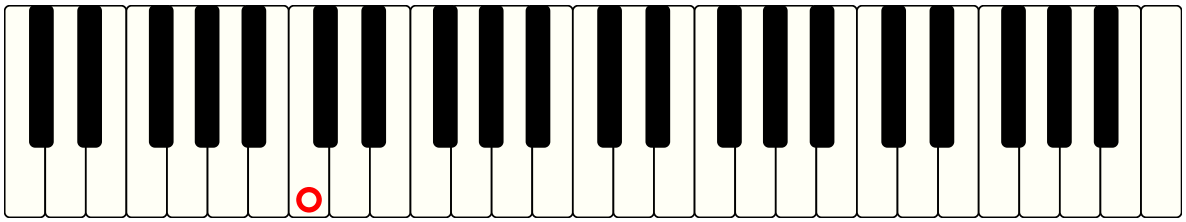

Question 6

Think of the name of the note on the following staff...

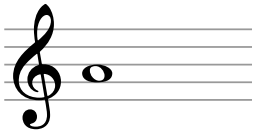

...select the matching key on the piano, respecting middle C position.

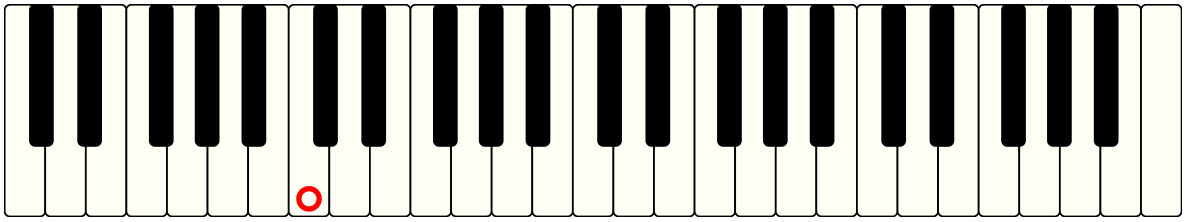

Question 7

Think of the name of the note on the following staff...

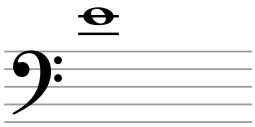

...select the matching key on the piano, respecting middle C position.

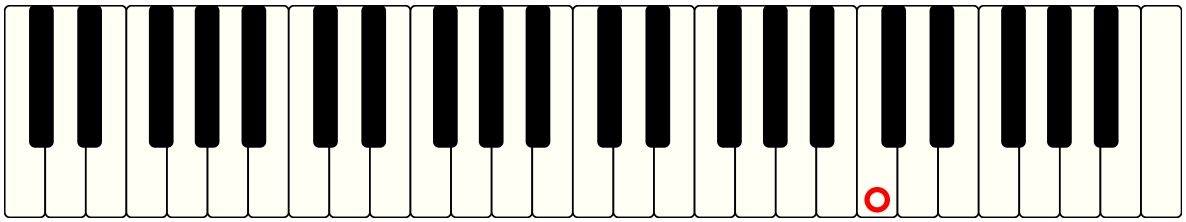

Question 8

Think of the name of the note on the following staff...

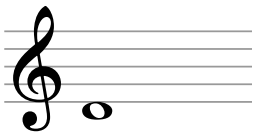

...select the matching key on the piano, respecting middle C position.

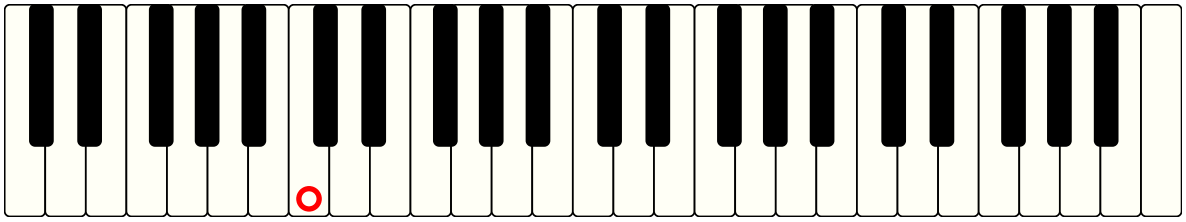

Question 9

Think of the name of the note on the following staff...

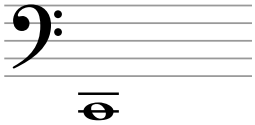

...select the matching key on the piano, respecting middle C position.

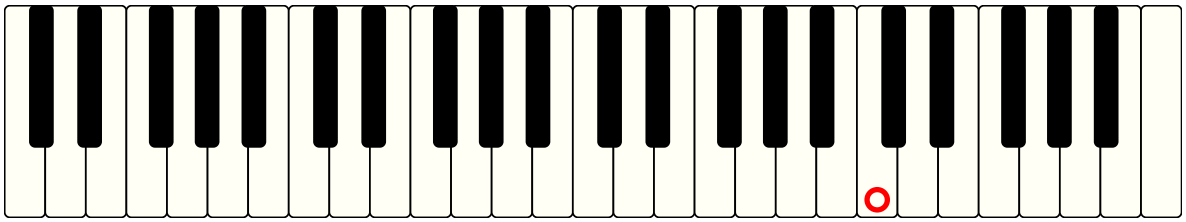

Question 10

Think of the name of the note on the following staff...

...select the matching key on the piano, respecting middle C position.

D — Memory of the Keyboard (2 Qs, 1 pt each)

Question 1

Between which of the following two notes is there no black key?

A. C and D | B. D and E | C. E and F | D. F and G

Question 2

Again: Between which of these two notes is there no black key?

A. G and A | B. A and B | C. B and C | D. C and D

1.V — Accidentals and Enharmonics

A – Analysis: Pitch Names with Accidentals and Octaves in a Piece (1 Q, 6 pts)

Enter the pitch name with octave designation (e.g. **C3**) in the boxes below.

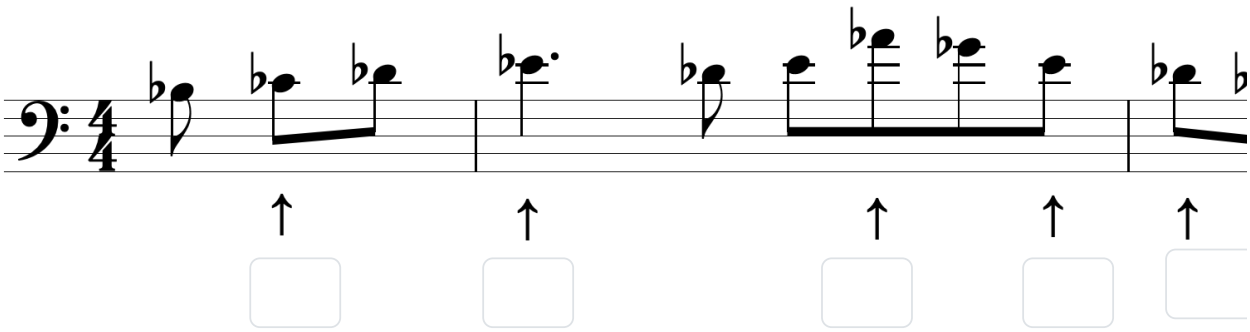

For example, for the note beginning the piece, you would write "**Bb3**". Do not put a space between the letter and number.

[Traditional Irish], *Danny Boy*, opening

D — Keyboard to Name with Multiple Enharmonics (8 Qs, 1 pt each)

For each question, you will be given a note highlighted on the keyboard. You then will need to write **two** enharmonic names of the pitch separated by a space. Omit the octave number from your answer.

Question 1

Find the highlighted key on the piano...

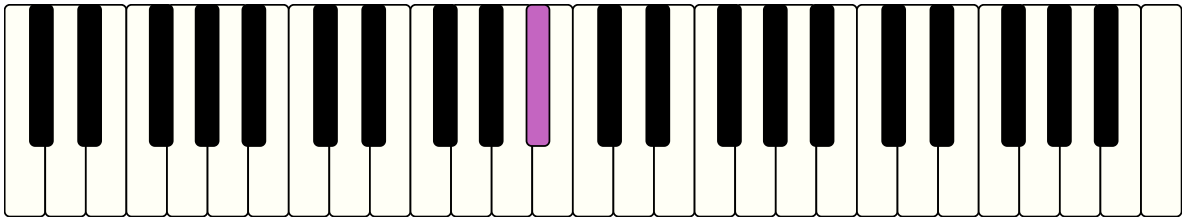

...type the name of the note into the box.

You must enter two different names for the pitch, with a space in between.

Question 2

Find the highlighted key on the piano...

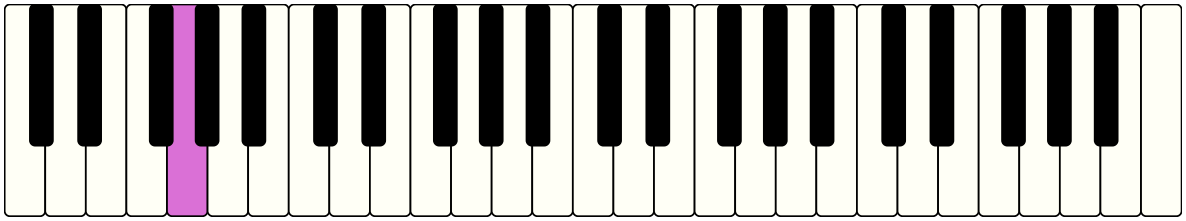

...type the name of the note into the box.

You must enter two different names for the pitch, with a space in between.

Question 3

Find the highlighted key on the piano...

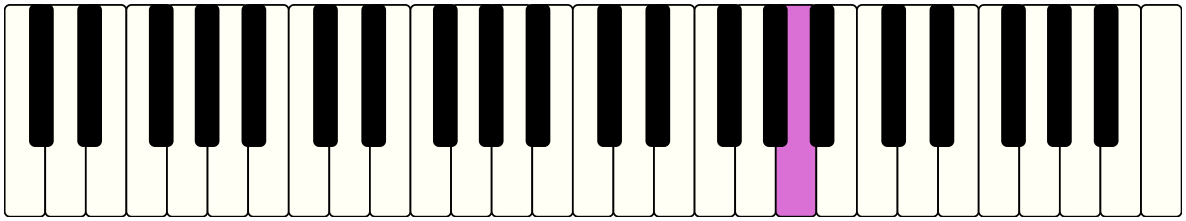

...type the name of the note into the box.

You must enter two different names for the pitch, with a space in between.

Question 4

Find the highlighted key on the piano...

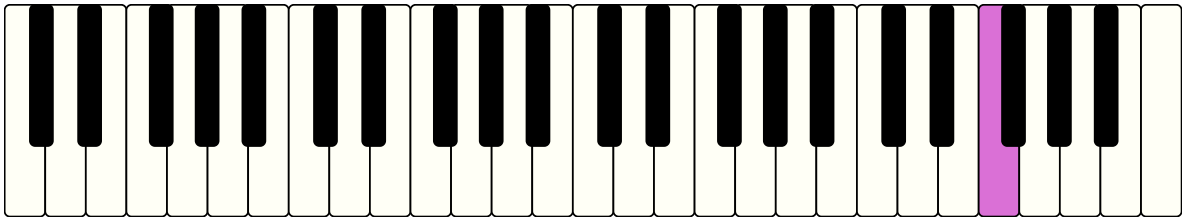

...type the name of the note into the box.

You must enter two different names for the pitch, with a space in between.

Question 5

Find the highlighted key on the piano...

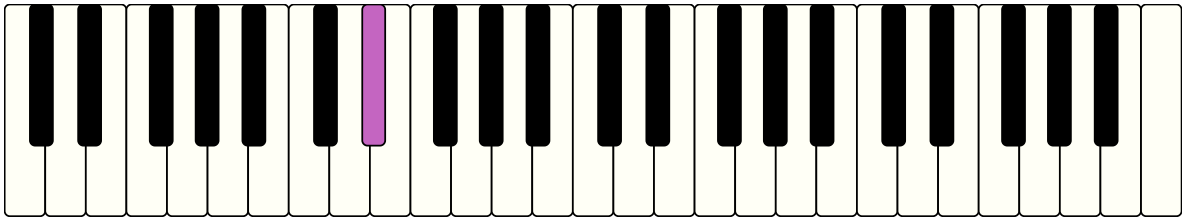

...type the name of the note into the box.

You must enter two different names for the pitch, with a space in between.

Question 6

Find the highlighted key on the piano...

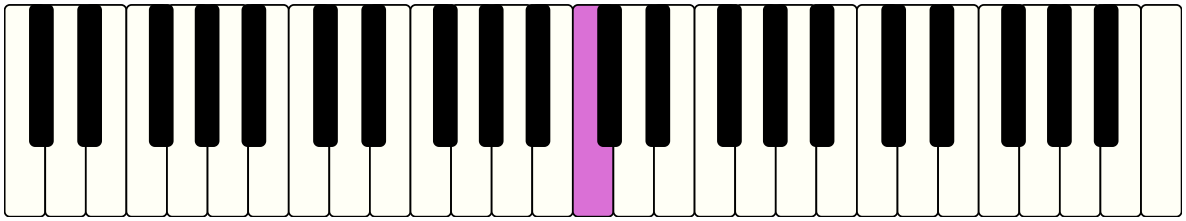

...type the name of the note into the box.

You must enter two different names for the pitch, with a space in between.

Question 7

Find the highlighted key on the piano...

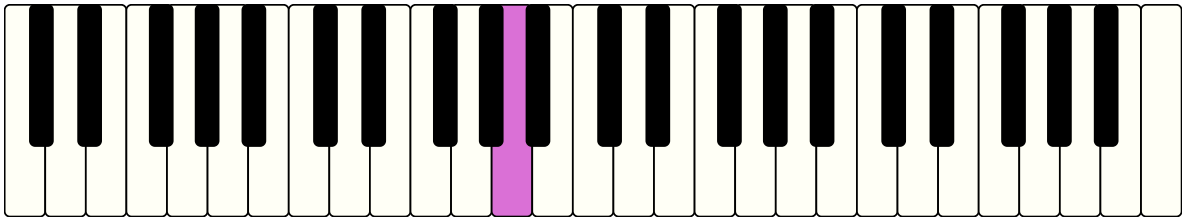

...type the name of the note into the box.

You must enter two different names for the pitch, with a space in between.

Question 8

Find the highlighted key on the piano...

...type the name of the note into the box.

You must enter two different names for the pitch, with a space in between.

E — Staff to Pitch Name with Multiple Enharmonics (6 Qs, 1 pt each)

For each question, you will be given a note written on a staff. You then will need to write the name of the pitch **and an enharmonic equivalent** separated by a space. Include the **octave number** of the notes; for example, "C4 B#3".

Question 1

Think of the name of the note on the following staff...

...type the name **and octave** of the note into the box.

Give the name of the pitch, and then an alternate, enharmonic name. Put a space in between the two answers.

Question 2

Think of the name of the note on the following staff...

...type the name **and octave** of the note into the box.

Give the name of the pitch, and then an alternate, enharmonic name. Put a space in between the two answers.

Question 3

Think of the name of the note on the following staff...

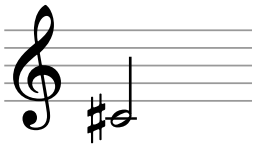

...type the name **and octave** of the note into the box.

Give the name of the pitch, and then an alternate, enharmonic name. Put a space in between the two answers.

Question 4

Think of the name of the note on the following staff...

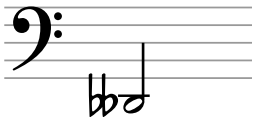

...type the name **and octave** of the note into the box.

Give the name of the pitch, and then an alternate, enharmonic name. Put a space in between the two answers.

Question 5

Think of the name of the note on the following staff...

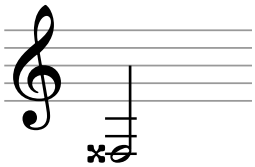

...type the name **and octave** of the note into the box.

Give the name of the pitch, and then an alternate, enharmonic name. Put a space in between the two answers.

Question 6

Think of the name of the note on the following staff...

...type the name **and octave** of the note into the box.

Give the name of the pitch, and then an alternate, enharmonic name. Put a space in between the two answers.

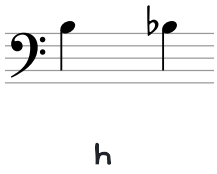

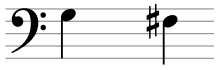

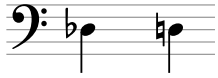

F — Whole Steps vs. Half Steps (10 Qs, 1 pt each)

For each pair of notes written as a melodic interval, write in the input box:

- "**w**" if the interval is a whole step (whole tone) or
- "**h**" if the intervals is a half step (semitone), whether chromatic or diatonic.

Click in the box or on any score fragment to hear the intervals played.

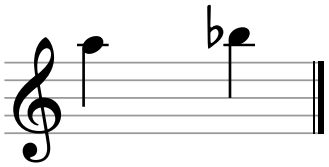

Consult a piano keyboard if you are unsure if there is another note between the two.

Example Example	***Example*** Example	Question 1	Question 2
 h	 w		
Question 3	Question 4	Question 5	Question 6
			
Question 7	Question 8	Question 9	Question 10
			

G – Diatonic vs. Chromatic Half Steps (8 Qs, 1 pt each)

Identify each of the following pairs of notes as representing a "diatonic half step" (Diatonic H), "chromatic half step" (Chromatic H), or neither. The notes can be ascending or descending, and are presented as either on a staff or just with their names.

Question 1

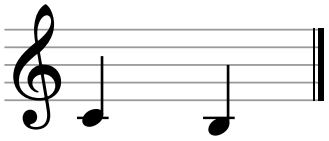

Diatonic H | Chromatic H | Neither

Question 2

Diatonic H | Chromatic H | Neither

Question 3

Diatonic H | Chromatic H | Neither

Question 4

A♯–B

Diatonic H | Chromatic H | Neither

Question 5

D–D♯

Diatonic H | Chromatic H | Neither

Question 6

Diatonic H | Chromatic H | Neither

Question 7

Diatonic H | Chromatic H | Neither

Question 8

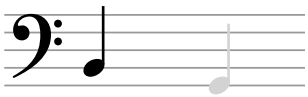

Diatonic H | Chromatic H | Neither

H — Writing Whole and Half Steps (10 Qs, 1 pt each)

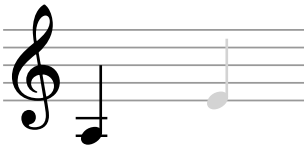

Adjust the second note until it is the specified interval above or below the first note, using either diatonic or chromatic intervals.

Question 1

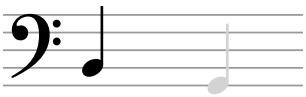

Whole Step Below

Question 2

Half Step Below

Question 3

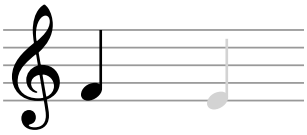

Whole Step Above

Question 4

Half Step Above

Question 5

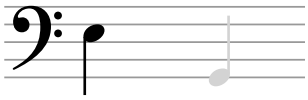

Whole Step Above

Question 6

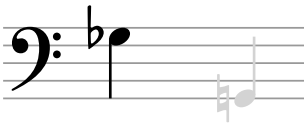

Half Step Below

Question 7

Half Step Below

Question 8

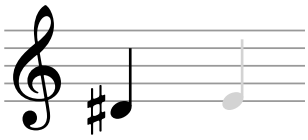

Half Step Below

Question 9

Half Step Above

Question 10

Whole Step Below

G — Transpose by Octave to a New Clef (with Accidentals) (2 Qs, 2 pts each)

Rewrite the given melody in a new clef (the number of octaves to change will be given below).

Question 1

Above: Given melody (click to play)

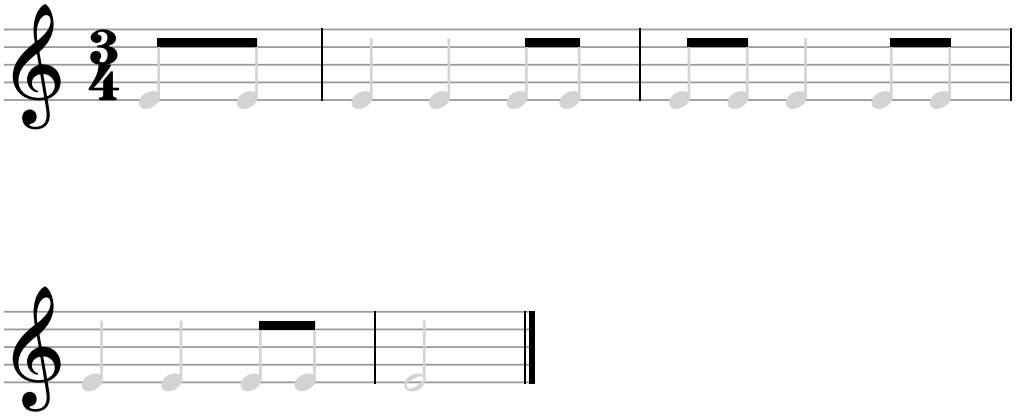

Rewrite the melody in the new clef while transposing the melody **1 octave down.**

Question 2

Above: Given melody (click to play)

Rewrite the melody in the new clef while transposing the melody **2 octaves up.**
